

The Quality of our Reality Creating is little more than a Scorecard for the Quality of our Connection with Source

By J.Hamilton Last revised 3/21/2009

COREsonance is the synergistic amalgamation of the best that is available in the world of neurofeedback from a specific perspective – a perspective that has barely been addressed. And while neurofeedback has proven to be effective at addressing a wide range of maladies and dysfunctions in the human experience, the medical community has barely touched on prevention much less address advancing consciousness as a means of **staying healthy, wealthy, happy and wise.**

It is in the arena of intentionally advancing consciousness, i.e., the bringing along of a new level of contribution and order to our lives, that humanity begins to truly thrive, help itself and contribute to the unfolding of a successful species on planet earth. And while scraped knees and broken bones have been the venue of the medical doctor and the saving of souls has been the venue of the church, it is in the addressing of our *overall* health that we avail ourselves of true success, true advancement and true contribution to the unfolding of who we each are and the place we call home. As someone once said, **"If not us, who?"** and **"If not now, when?"**

For, you see, we are made up of trillions of cells, all of which operate within an astounding *implicate order* that is far beyond our capacity to prod and poke into becoming more on our own. We simply *assume* healing and the order that keeps us from becoming a puddle of protoplasm on the floor. If we truly want to "be more," we must address ourselves from a perspective that recognizes this [implicate order](#) to capably deliver us into the 21st century. For if we want to be truly successful, we must emulate something that works; a system that far exceeds anything we have been able to devise on our own.

For humanity to be successful, we are going to have to learn how to mesh with something immeasurable. For our very survival, we are going to have to reestablish our connection and "plug in" to a system that has proven itself over eons of time. This is the new **Self-determinism with a capital S.**

To quote Warren Buffet in his March 09, 2009 [interview](#) with CNBC:

"Everything will be all right. We have the greatest economic machine that man has ever created."

Not wishing to be critical but it must be pointed out that we are not going to *think* our way out of the failure of our synthetic, man-made, economic lifeblood model and attempts at dominion over our planet. More regulation is not going to be the answer other than in the short run. **Instead, the mind of man blending with the Cosmos** will engender far greater things.

Our success as a species is dependent upon this next iteration of our evolution, which I daresay may be dramatic. We are going to have to find our way to a much more sophisticated interpretation of success than what we have presently created and handily, it already exists. It is in the oneness and shared connection with Innate Intelligence that we truly thrive and express at the next level of our possibilities.

Not so different from a **successful chorus** with each individual singing their part and each contributing to the whole! This was the likely vision of communism and socialism but they left out the most important ingredient; the part that binds it all together. This important link is what allows the trees their symphony, the schools of fish their orchestral arrangements and soon the humans their octaves of contribution. Because you see, humans cannot successfully group together under their own mechanism. They must adopt a model that already exists. And to do this intentionally is a huge event! It is of a migration of sorts, a true definition of success for which the stars and beyond become our realm!

It is my belief that Barack Obama understands this, or close enough so, to keep the power mongers at bay long enough for us for us to get a foot up on our next iteration of success. It is my belief that Barack Obama understands the human spirit, and that the human spirit unleashed in sync with the Cosmos, can solve its own problems!

And, what is the fast track for accomplishing this? Coherence and resonance and a meshing with Source is the only way. We have to take what we have accomplished as a species and blend it with Innate Intelligence for what is next. **It is in this refining of our nature that reality becomes the scorecard for the quality of our connection with Source.**

Thus, in our ability to induce our nervous systems to coherence, we become able to assimilate Innate Guidance into our lives in all-together-new and wholly conscious manners. Innate Guidance brings multiplicities of "solutions-orientations," a must for our survival and development as a collective species. And while there have always been a few who have

glimpsed these orderly dimensions, it is in the ability to deliver coherence to a larger audience that we begin to make our next steps as a species.

Our next evolutionary step is to become **Self-determined**, coherent and resonant. And, intentionally advancing consciousness is the surest means of taking this step. Advancing consciousness becomes measured as nonresistance and the ability to blend with Innate Intelligence to allow Innate Guidance to process our surrounding in our behalf so that we may learn to see the world as whole. In other words, by our ability to open up to the Cosmos, we become throughput devices for which Innate Intelligence delivers *its* solutions to the world. This is called resonance and we all grow.

In nonresistance we become a mechanism for Innate Intelligence to express *itself* and in expressing Innate Intelligence, we express ourselves at all together new levels of being. And, as a conscious living and coherent being, we become exponentially more "useful" to the whole. It is in advancing consciousness that we discover our exponential value. To quote from Abraham of [Abraham-Hicks](#):

One person connected to Source is more powerful than one million who are not,"

The work of [Dr. David R. Hawkins](#), MD, PHD and others substantiates this.

Ultimately, nonresistance and consciousness are the same. It is in nonresistance that we allow ourselves to mesh with the wisdom of Universal Forces and become a major throughput device for Innate Intelligence to express itself. It is in the sophistication of our nervous systems that we are able to deliver the vast amperage of Innate Intelligence expressing *itself* into this dimension that allows us to thrive. And it is in the expressing of Innate Intelligence that we find our cohesiveness and the camaraderie that makes us all one. In awareness, we discover happiness, joy, mirth, a true definition of intelligence and finally become a true fit for our place on planet earth.

And for this, COREsonance had devised a means by which individuals can rapidly advance themselves, and in advancing themselves, contribute to, not only our own unfolding, but the whole. Through COREtraining Innate Guidance becomes available and "processes" far beyond our ability to do so on our own. It is in our ability to go beyond resistance that we become able to discern hints, insights and happenstance that contribute to our personal unfolding, thus making the world a better place.

Imagine a rose. It exists for no known reason. It is simply an expression of Innate Intelligence expressing *itself* for which the rose has a simple nervous system and no resistance whatsoever. In its model of nonresistance, as

found everywhere in nature, it exquisitely throughputs Innate Intelligence into this dimension such that our five sense can identify harmony, beauty and perfect order.

It is in the incredible bandwidth of the human nervous system, combined with nonresistance, refined and coherent and delivering amperage without measure, that we become useful to ourselves and thus exponentially the whole.

About the author. *J.Hamilton has been meditating for 36+ years and teaching personal empowerment for 18+ years. His book, **Visionaries Thrive In All Times: Blueprint for Reality Creation** (2005) is about the possibilities of individual and collective reality creation in alignment with Innate Intelligence.*

*J.Hamilton has recently completed (Jan 09) an eBook titled **Coherence Resonance Training** for the purpose of identifying access to nonresistance and the resultant Innate Guidance that becomes available. Key words: nonresistance, mindlessness, Innate Guidance, timelessness, solutions and timeliness. [Link](#)*

Presently, he is preparing for speaking engagements, in part to introduce COREresonance Training. COREresonance is a means of rapidly bumping consciousness such that that we become dramatically more able to contribute to the whole.
